Languages

English – **B2** level

Courses and Certifications

B2 Certified AGH English Exam

Python Data Scientist – DataCamp certified course – in progress

Data Analyst with SQL server – DataCamp course – in progress

Video Game creation with Python and Pygame – Udemy Course – in progress

Hobby

Cousine
Football – Premier League
Travelling
Geopolitics

Profile

I am a second year student on the field Engineering and Analysis of Data at AGH in Krakow. So far at the university I gathered fundamentals from Data Science and programming. My consecutive target on the way to become future IT employee is to gain experience in the industry. That is reason for applying for this three-month intern with an optional prolongation. My advantages are willingness to develop and quick grasping. As a hard-working, vigorous and fearless of new challenges person, I find myself appropriate candidate for this position.

Education

Engineering and Data Analysis · 2020-Current – AGH University of Science and Technology
        Engineering degree

Skills

Programming fundamentals in each language or program mentioned below.

Python:
        Manage and analysis of Data in **Pandas** and **Numpy**,
        Creating visualizations in **Matplotlib** and **Seaborn**,
        Coding 2D arcade games with **Pygame.**

SQL:
        Understanding **Relational DB** system,
        Usage of **queries**.

Linux:
        Processing files with linux **Commands**,
        Bash: base knowledge on writing scripts,
        AWK language,
        Regular Expressions.

C++:   Basics of **Object Oriented Programming.**

R: Application of libraries: **dplyr, lubridate, ggplot2,** to
            filter, modify or visualise data.

Matlab: Calculations on vectors and matrices.

Algorithms fundamentals.
